

MACRO-SI[®] 0.5-0-0 with 7.5% Silicon Dioxide

Macro-SI is a proprietary blend of nitrogen derived from protein hydrolysate, the material obtained by hydrolysis of proteins to their constituent amino acids and short polypeptides.

Rate:

Apply 16–64 ounces per acre with sufficient water for thorough coverage every 7–28 days; or, use in accordance with recommendations of a qualified individual or institution, such as, but not limited to, a certified crop advisor, agronomist, university crop extension publication, or apply according to recommendations in your approved nutrient management plan.

Application Instructions:

Shake well before use. When mixing, fill tank half way with water prior to adding Macro-SI, then fill with remaining water. Ensure suitable spray conditions (e.g. temperature, humidity, wind-speed), prior to foliar application.

Macro-SI is an alkaline material with a pH of 12.7 and should not be tank mixed with acidic chemicals. Do not mix concentrated form with acid-based products. If necessary, buffer tank water with a suitable buffering agent. Macro-SI can be tank mixed with commonly used fertilizers or pesticides, but due to its alkaline nature, it is recommended to conduct a standard jar test prior to mixing. Always add at least half the water to the spray tank before adding Macro-SI.

Store in original container in a cool, dry area. Keep out of the reach of children. Apply as directed.

Limited Warranty: Seller offers for sale the product Macro-SI. There are no warranties of merchantability of fitness for a particular purpose which extend beyond the description of the product in this label and liability of Seller is limited to replacement of any product which does not meet these specifications. Suggestions for use and information on results obtained with its use are assumed by the manufacturer to be reliable. Since conditions of use are outside the control of Seller, the buyer is responsible for all results, including injury and damage stemming from the use of this product alone or in combination with other materials.

Information concerning the raw materials composing this product can be obtained by writing to the Guarantor listed on this box, and referring to the batch number found on this container.

Guaranteed by: **Weldon's Chemical LLC**
25 Roland Avenue, Mount Laurel, NJ 08054
Made in Spain 856-266-9440

Guaranteed Analysis	
Total Nitrogen (N).....	0.50%
0.50% Water Soluble Nitrogen	
Derived from: Porcine Protein Hydrolysate	
	F002121

ALSO CONTAINS NONPLANT FOOD INGREDIENT:
7.5% Silicon Dioxide (SiO₂) derived from Sodium Silicate
In MS: Low Analysis Fertilizer.

DANGER

Harmful if swallowed, causes severe skin burns and eye damage.

May cause respiratory irritation. Wear proper personal protection.

Avoid contact with skin and eyes and avoid breathing spray mist.

See Safety Data Sheet for further details regarding safe use of this product.
