MACRO-SORB[®] RZT™ 5-5-0

Macro-Sorb RZT is a proprietary blend of nitrogen derived from protein hydrolysate, the material obtained by hydrolysis of proteins to their constituent amino acids and short polypeptides, and phosphorous recommended for use any time plants require nutritional stimulation to aid in seed germination or increased root development.

DIRECTIONS FOR USE:

Apply as directed. Apply 32 to 128 fluid ounces per acre. Apply initial application with the first watering after transplant. Follow with one or two additional applications every 7 days after initial application. Macro-Sorb RZT can be applied through any method that will place the product in the plant's root zone (drip irrigation, drench, plant water, etc.) The maximum recommended rates are for mature plants. Use lower rates when applying to smaller plants. If you have any questions regarding mixing or application rates contact your Macro-Sorb dealer before using this product.

Limited Warranty: Seller offers for sale the product Macro-Sorb RZT. There are no warranties of merchantability of fitness for a particular purpose which extend beyond the description of the product in this label and liability of Seller is limited to replacement of any product which does not meet these specifications. Suggestions for use and information on results obtained with its use are assumed by the manufacturer to be reliable. Since conditions of use are outside the control of Seller, the buyer is responsible for all results, including injury and damage stemming from the use of this product alone or in combination with other materials.
